

100 PROFITABLE NICHE IDEAS

Below are 100 hand-picked niches that I have researched for you. I believe these niches could be very profitable for anyone willing to put the time and effort to build a high-quality site around.

Honestly, you can earn money with any niche – this could be your hobbies or something you’re good at. So, you don’t have to strictly choose exactly below. You can use these exact ideas, or you can also use them to spark your own ideas.

Some ideas below are very precise or specific. The best plan of action, when choosing a very specific niche, is going to start small and then expand to related niches. Just remember to choose a domain name that allows you some wiggle room for topics.

On the other hand, some of the ideas in here are general markets that I believe could be profitable. It’s always good to start with asking yourself, “How can I target a more specific audience”. You may want to choose something like “lose weight” industry, because you have a great story to share. However, this niche belongs to a very competitive market to jump into.

Choosing Your Niche

Before you choose a niche for your site, it’s always best to start with a niche you are interested with. Choosing a niche solely because you think it will sell well is a recipe for failure. This is because you will be working about this topic by writing about it so often. You don’t honestly have to be an expert, but you need to be interested with the topic itself, so you will not get burned out and quit.

We aren’t always going to be able to match our passions to a profitable business, but you are a beginner, the most important this is that you pick a topic you want to work on and WANT to build. Learning how to build your first affiliate marketing website comes with many challenges – make it easier on yourself by picking something you care to research, write about, promote, and share.

If you have any questions, want to double check your niche idea, or would like to bounce some ideas around with me, don’t hesitate to send me a message on WA.

Hobbies

1. Wine Making at Home
2. Niche Specific Photography
3. Stargazing
4. Road Trips
5. Precious Metal Investing & Storage
6. Poker Strategies
